This program is for all

- AI4ALL Open Learning is designed to include and empower underrepresented high school students.
- Facilitators are high school teachers or CBO staff with a commitment to inclusion and a desire to learn alongside their students.
- No artificial intelligence or computer science experience is required for facilitators or students.
Students will leave knowing

- What is AI? How do I recognize it when I see it?
- What is the impact of AI? What are some of its benefits and pitfalls?
- How does data affect how machines learn?
- How can high schoolers get on a pathway towards a career in AI, if that is their desire?
- How is the world around us informed or uninformed about AI, and how can we share our knowledge with others?

Facilitator guides

- Guides are provided for the course (ExploreAI), each unit, each project, inclusive discussions, and the curriculum platform.
- Pacing guides help facilitators adapt the curriculum for 10-, 20-, and 30-hour blocks.
- Curriculum can be used in any class or club. Recommendations exist for ELA courses on close reading, Social Studies courses covering technology policy, and Computer Science courses.

How to use the program

- AI4ALL Open Learning is designed to be used in the classroom, in an after school club, or as a workshop with a facilitator guiding groups of students.
- Curriculum, facilitator guides, and forums are freely accessible on olp.ai-4-all.org.

Empower your students with AI.
